DAIRY PLANTS SURVEYED and APPROVED

by U. S. Department of Agriculture

- *Under Regulations Governing Inspection and Grading of Manufactured or Processed Dairy Products*

AMS-509 Revised January 1964

U. S. DEPARTMENT OF AGRICULTURE
Agricultural Marketing Service
Dairy Division Washington, D. C.

USDA APPROVED PLANTS
MANUFACTURED, PROCESSING, OR
PACKAGING DAIRY PRODUCTS

Each of the dairy plants listed on the following pages has been surveyed (inspected) within the past 12 months by qualified inspectors licensed and supervised by Inspection and Grading Branch, Dairy Division, Agricultural Marketing Service. Guidelines for making the surveys are contained in the "USDA Minimum Specifications for Approved Plants Manufacturing, Processing, and Packaging Dairy Products." Assignment of "USDA Approved" is a recognition of high level dairy plant operations based on critical evaluation of more than 100 items including plant facilities, condition of equipment, sanitary practices, processing procedures, and quality improvement programs for raw milk and cream.

The USDA plant survey program has been used by the dairy industry for more than 10 years. It is recognized by dairy plant managers as an important means for improving and maintaining sound operations including plant, processing equipment, processing and packaging procedures, sanitary practices, and quality programs for raw materials to help assure that their products will be of uniform high quality, will meet specific grade or contract requirements, and will have good keeping quality.

Included in this publication are the names of plants (indicated by asterisks) that use USDA dairy products grading services on a full-time (resident) basis. This program offers on-the-spot official grading, laboratory testing and quality control, and plant survey services. In addition, it makes available to the plant manager the technical know-how and experience of the inspection and grading supervisory staff, including laboratory chemists and bacteriologists, to help solve quality control problems.

Plant survey and resident grading service are available on a voluntary basis, and fees are charged to cover costs. Managers of dairy plants or other interested parties may obtain information about these services by contacting the Inspection and Grading Branch area office nearest them. (See directory of offices inside of back cover.)

This publication will be revised from time to time to reflect changes in plant status and to include new plants. Participation in the plant survey program is voluntary, and absence of the name of a plant from the list does not necessarily mean that a plant is ineligible for grading services.

USDA inspection and grading services are performed under the "USDA Regulations Governing Grading and Inspection of Manufactured or Processed Dairy Products," Title 7, Chapter 1, Part 58, sections 58.1 - 58.63, of the Code of Federal Regulations.

LIST OF APPROVED DAIRY PLANTS SURVEYED
UNDER THE USDA REGULATIONS GOVERNING
INSPECTION AND GRADING OF MANUFACTURED
OR PROCESSED DAIRY PRODUCTS

NAME OF FIRM	LOCATION	PRODUCT MANUFACTURED UNLESS OTHERWISE INDICATED
